

# I-Grip™ Control

## Single Multi-Axis Proportional Control

***The I-Grip™ incorporates today's technology into a proportional single Joystick. This provides you with an industry leading approach to hydraulic function control. Our, one point of contact and one point of control design provides the safest environment available. This system comes from 50 years of listening to our customers and providing solutions for their needs.***

### Standard Features:

- **Contactless Mode Selection**  
Tactile design allows user to select modes by hand position.
- **5 Button LED Backlight Face**  
Auxiliary buttons provide use with additional program modes or auxiliary switch functions.
- **Integrated Spreader and Spinner Functions**  
Operate all spreader and spinner functions from the joystick.
- **Unlimited Float Modes**  
Allows user to float any function.
- **Windows Based Software Programming**  
Easily program the joystick to your precise requirements.
- **Full Proportional Control**  
Operate equipment smoothly and safely with infinitely adjustable speed control.
