

# Get Tough on Gravel and Ice with The Monroe Eradicator

- Fits most John Deere and Caterpillar motorgraders with scarifier or B-Hook lift groups.
- Allows you to avoid changing your entire motorgrader moldboard cutting edge just to scarify ice or to pre-condition gravel roads.
- Swept-back V-angled design ensures that processed aggregate flows evenly and rapidly through the bits for longer wear.
- Eradicator available with 48 rotating carbide bits (optional) while the motorgrader moldboard follows to feather and form the loosed material.
- Perfect to scarify ice and hard-packed snow from road surface.
- Helps to mix and disperse calcium chloride or other conditioners throughout the aggregate surface.
- Removes washboard when grading gravel roads.
- Allows resurfacing of oil and chip roadways without deep scarifying.
- Monroe Eradicators are painted with baked-on polyurethane yellow paint.

Eradicator-S for Deere Scarifier Attachments  
(Shown with optional mounting boards  
& rotating carbide bits)

- 100% welded construction
- Quick changeability saves time while extending carbide bit life.
- Width: 91" tooth coverage. Requires two mounting boards and 48 rotating carbide bits (optional)
- Weight: 517lbs for Deere scarifier compatible S-Series unit or 765lbs for Monroe/Balderson compatible B-Series unit

Eradicator-B for Monroe or Balderson Lift Groups  
Attachments (Shown with optional mounting boards and  
rotating carbide bits.)

# Nothing Breaks Up Ice or Pre-Conditions Wash-Boarded Gravel Roads Like the **MONROE** Eradicator!

**Eradicator-B shown with mounting boards and rotating carbide bits (optional, not included as standard).**

The results: Packed snow and thick ice have no chance against Monroe's Eradicator when paired with rotating, carbide bits and hardened mounting board cutting edges (optional).

Note the Monroe SnowRanger 12' wing this customer has also installed on his John Deere 772D motorgrader. Monroe builds a full line of construction attachments. See your John Deere dealer or contact Monroe Truck Equipment. Shown peeling up packed snow and ice, Spring 2009
