

# SPREADER

## REAR CROSS CONVEYOR

Shown with optional spinner assembly and berm chute.

### Features:

- Spreads a wide variety of material which includes all types of aggregate and hot mix asphalt.
- Performs shoulder maintenance, rut-filling, asphalt-patching and ice control.
- Available in a 12" or 18" conveyor width.
- Bi-directional conveyor provides driver side or passenger side discharge.
- Quick attach/detach, self-leveling mounting hardware.
- Hi-Temp Straight belt with flexible stainless splicings.
- Caged-design drive and idler pulleys.
- Poly support rollers with stainless steel shaft, which eliminates the need for bearings.
- Heavy Duty Bearing and belt adjustment.

### Options:

- 4' extension with belt to mount to hydraulic truck conveyor.
- Light package--stop, turn & tail with 3-light cluster.
- Sand bag attachment.
- Spinner assembly.
- Reversing Valve.
- Berm chute.
- Corrosion-Resistant Stainless steel

Heavy duty self-cleaning caged drive and idler rollers.

The quick attach/detach self-leveling mounting hardware allows the rear cross conveyor to stay level when the dump body is raised.

## CROSS CONVEYOR OPTIONS

Optional Berm Chute

4' Extension with caged rollers,  
Heavy duty bearings and Hi-temp  
straight belt
